NPTEL COURSE SYLLABUS

Object Oriented System Development using UML, Java and Patterns

OBJECT ORIENTED SYSTEM DEVELOPMENT USING UML, JAVA AND PATTERNS

PROF. RAJIB MALL

Department of Computer Science and Engineering
IIT Kharagpur

PRE-REQUISITES : Programming Using Java, Software Engineering

INTENDED AUDIENCE : CSE, IT

COURSE OUTLINE :

Object-oriented software development has become very popular. Also, UML has been accepted as the standard design language. We discuss use of UML to arrive at a design solution. Skeletal java code generation from UML diagrams will be discussed. Design patterns are reusable solutions. These are good solutions to typical programming problems, that can be understood and applied in a specific design situation to improve the overall design and reduce design iterations.

ABOUT INSTRUCTOR :

Prof. Rajib Mall is Professor, Department of Computer Science and Engineering, Indian Institute of Technology Kharagpur, West Bengal. He has more than a two decades of teaching experience in the areas of real-time systems, program analysis and testing. He has written five text books and over 150 refereed research papers.
